Frameworks: React, Tailwind, Numpy, Pandas

Web: MongoDB, Express

Tools: Git/GitHub, Docker, Notion

Soft Skills: Leadership, Communication, Team, Presentation

Education

Silicon University, Bhubaneswar

Department: Computer Science & Engineering

Nov 2022 – Present

Courses: Operating System, DBMS, Computer Architecture

CGPA: 9.07

Experience

Azure Intern, Ingenious Technologies

Jun 2024 – Aug 2024

- Utilised Azure infrastructure to deploy, maintain, and secure a full-fledged project.
- Leveraged **Azure Storage** solutions like Containers for data management and backup.
- Configured **Azure Load Balancer** and **Application Gateway** for traffic distribution and security.
- Implemented **Azure Active Directory** for identity and access management.

Projects

SWITCH Club Website

[GitHub](#) || [Live](#)

Tech: React, Tailwind

- Developed a fully responsive club website showcasing events, team members, and club activities.
- Implemented a dynamic homepage with sections for events, announcements, and a team gallery to enhance user engagement.

Blogify

[GitHub](#) || [Live](#)

Tech: React, Tailwind

- Built a full-featured blog platform optimised for both desktop and mobile devices.
- Created a user-friendly dashboard for managing blog posts, including features for creating and editing posts.

Terraform Azure Architecture

[GitHub](#)

Tech: Azure, HCL, Terraform

- Designed and deployed two Azure Virtual Machines (VMs) and configured an Azure Load Balancer using Terraform for infrastructure as code (IaC).
- Automated cloud resource provisioning and management with Terraform scripts.
- Used Ansible for remote configuration and automated tasks like software installation.

Awards and Certifications

- Top 10 Finalist in Hackathon conducted by Trident College, BBSR.
- Runner-up of Build-o-Thon (Entrepreneurship Hackathon).
- Winner of several coding events conducted by technical clubs.
