SKILLS

- **Frontend:** React.js, Angular, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- **Backend:** Python (FastAPI), Node.js, Express.js, REST API Development
- **Databases:** MongoDB, SQL
- **Tools:** Git, GitHub, Docker
- **Core Concepts:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

EDUCATION

- **Silicon University, Bhubaneswar**
B.Tech in Computer Science & Engineering Nov 2022 – Jun 2026
CGPA: 9.06

EXPERIENCE

- **Trainee Product Engineer, Inovaare** Jul 2025 – Present
 - Designed and developed scalable microservices using **Python FastAPI** to support enterprise-grade frontend widgets.
 - Integrated FastAPI services with **MongoDB** and legacy Java backend systems for seamless cross-service communication.
 - Built RESTful APIs powering modular frontend features while improving scalability and maintainability.
 - Collaborated with cross-functional teams to integrate frontend components within a microservices architecture.

PROJECTS

- **Card & Badge Studio (React + Tailwind CSS)** GitHub
 - Engineered an interactive card designer supporting **15 customizable templates** with a live real-time editor and instant visual feedback.
 - Implemented immersive **3D holographic tilt effects** using CSS transforms, pointer tracking, and layered visual overlays.
 - Built a **3× PNG export pipeline** using html-to-image and designed a modular component architecture with reusable card renderers.
- **Route Optimiser (React + FastAPI + Python)** GitHub
 - Built a graph-based route optimization system implementing **Dijkstra, A*, BFS, DFS, and Yen's K-Shortest Paths**.
 - Developed a custom Graph ADT with adjacency lists, Union-Find connectivity checks, and dynamic road closure support.
 - Designed an interactive SVG map with algorithm visualization and benchmarking tools comparing execution time, path cost, and explored nodes.

CONTRIBUTIONS

- **SWITCH Club Website** GitHub — Live
 - Contributed to the development of a responsive club website featuring workshops, events, and member information.
 - Improved performance, accessibility, and mobile responsiveness for a better user experience.

ACHIEVEMENTS

- Secured **1st Place** in the **Hour of Code**, **Codentine**, and **Data Crunch** coding competitions.
- Ranked among the **Top 10 teams** in the **TriThon Hackathon** organized by Trident College.
- Awarded **Runner-up** in the **Build-o-Thon Entrepreneurship Hackathon** for developing an innovative product solution.
